AFRICHEM

Safe and Healthy Pool Chemicals

The strong solution for harsh AFRICAN pool conditions

AFRICHEM

Safe and Healthy Pool Chemicals

BASIC POOL CARE

Swimming Pool Water Balance

Swimming pool water must be checked and balanced weekly.

pH levels: Maintain between 7.2 - 7.6 in plastered pools and between 7.0 - 7.2 in fibreglass pools.

Total Alkalinity (TA) levels: Maintain between 80ppm - 120ppm for plastered pools and between 120ppm - 150ppm for fibreglass pools.

Chlorine levels: Maintain between 1.5ppm - 3.0ppm (summer) and between 1.0ppm - 1.5ppm (winter).

Weekly Pool Maintenance

4 Easy steps to making pool care simple:

1. Remove all leaves and debris from the pump and weir baskets weekly.
2. Brush down the pool walls and floor weekly.
3. Back wash every week to maintain filter efficiency.
4. Run filter 12 hours per day in summer and 6-8 hours in winter.

SANITISERS

Granular Chlorine

- Quick release for maximum sanitation
- Kills bacteria and algae on contact
- Enhances water clarity

4kg	**580-1089**
10kg	**580-1090**
25kg	**580-1026**
45kg	**580-1025**

125 TCCA

- 90% stabilised granular chlorine
- Strongest chlorine shock treatment in SA
- Sanitises pool water
- UV protected
- Long lasting

2.5kg	**580-1000**
50kg	**580-1075**

Shock

- Chlorine shock
- Use to remove organic contaminants from pool water

500g **580-1010**

Stabilised Chlorine Pills

- 90% stabilised chlorine
- Sanitises pool water and inhibits algae growth
- Maintains chlorine levels
- Long lasting, slow releasing
- Placed in floating pill basket or skimmer

1.6kg **580-1069**
50kg **580-1070**

Double Action Pool Floater

- Chlorine feeder with 90% available chlorine
- Unique combination of boost and slow release of stabilised chlorine
- Eliminates need for shock prior to application
- Ensures immediate and maximum sanitation

1.5kg **580-1017**

Big 5 Multi Performance Floater

- Chlorine feeder with 90% available chlorine
- Shock treatment
- Sanitises pool water
- Inhibits algae growth
- UV protected
- Enhances water clarity

1.5kg **580-1001**

Splash Pool Protector

- Chlorine feeder with 90% available chlorine
- Sanitises pol water and inhibits algae growth
- UV protected

800g **580-1067**

ALGAECIDES

Algaecide / Extra Strength

- Eliminates/prevents black and green algae
- Reduces monthly chlorine consumption
- Built-in flocculant to ensure crystal clear water
- Use extra strength algaecide for large pools

2l algaecide	**580-1002**
25l algaecide	**580-1003**
2l extra strength	**580-1004**

Blue Algaecide

- Eliminates mustard algae
- Inhibits algae growth
- Built-in flocculant to ensure crystal clear water

2l	**580-1082**
25l	**580-1084**

Oxidise 50% (Peroxide)

- Complete chlorine replacement product
- Eliminates green algae
- Bleaches unsightly stains

5l	**580-1041**

WATER CLARIFIERS

Clear & Blue

- Improves water clarity
- Helps the sand capture smaller particles of dust
- Ensures crystal clear and sparkling pool water

2l	**580-1030**

Floc-It

- Drops suspended material to the pool floor so that dirt can easily be vacuumed out
- Clears cloudy water

2l	**580-1038**
25l	**580-1039**

Aqua Sheen

- Drops suspended material to the pool floor so that dirt can easily be vacuumed out
- Ensures crystal clear and sparkling pool water

2kg	**580-1007**
50kg	**580-1009**

Wonder Cube

- Removes phosphates
- Ensures crystal clear and sparkling water
- Reduces chlorine consumption
- Lasts up to 1 month in swimming pool water

Wonder cube	**580-1076**

SPECIALISED CHEMICALS

Metal Remover

- Removes metal stains and metal deposits from the pool water and surface
- Prevents staining

2l	**580-1040**
25l	**580-1085**

Sand Filter Wash

- Removes grime, oil and organic build up
- Improves filter circulation
- Can be used as a filter aid in small doses

2l	**580-1053**

Diatomaceous Earth

- Ensures crystal clear and sparkling pool water

1.75kg	**580-1032**
3.5kg	**580-1091**

WATER BALANCING

pH Increase

- Increases pH in plastered pools

1kg	**580-1042**
2kg	**580-1044**
25kg	**580-1077**
50kg	**580-1046**

Liquid Acid

- Hydrochloric acid
- Balances pH and reduces alkalinity levels
- Can be used as an acid wash on very stained swimming pool surfaces

5l	**580-0000**
25l	**580-0001**
2 x 5l (boxed)	**580-0003**

Dry Acid

- Balances pH and reduces alkalinity levels

3.5kg	**580-0002**

Boost & Buffer

- Increases pH in fibre glass pools
- Increases TA in all surface pools

1kg	**580-1012**
2kg	**580-1015**
25kg	**580-1014**

Chlorine Protector

- Protects chlorine, especially calcium hypochlorite non-stabilised chlorine, from the sun's UV rays

1kg	**580-1028**
25kg	**580-1071**

Calcium Chloride Flakes

- Increases calcium hardness

2kg	**580-1019**
4kg	**580-1018**

SPA PRODUCTS

Spa Tabs

- Maintains chlorine levels
- Sanitises spa water

500g	**580-1065**

Spa Salts

- Softens and perfumes spa water

Lavender 250g	**580-1058**
Magnolia 250g	**580-1057**
Peach 250g	**580-1060**

WE ASPIRE TO DELIVER SAFE AND HEALTHY POOL CHEMICALS

COMMON SYMTOMS & TREATMENTS

Swimming Pool Water has a tinge of green

- Indicates incorrect pH and TA and presence of metals
- Test water using AQUACHECK YELLOW TEST STRIPS
- Add AFRICHEM METAL REMOVER
- Correct pH using AFRICHEM ALKALINITY or AFRICHEM ACID

Swimming pool water is green

- Indicates severe algae infestation or phosphates
- Test water using AQUACHECK YELLOW TEST STRIPS
- Correct pH and TA level
- Add AFRICHEM ALGAECIDE / EXTRA STRENGHT
- Shock treat using AFRICHEM GRANULAR CHLORINE or use AFRICHEM FLOC-IT and then AFRICHEM ALGAECIDE

Green walls

- Indicates a minor algae infestation
- Treat as above or use AFRICHEM OXIDISE or AFRICHEM ALGAECIDE / EXTRA STRENGHT

Black or Green Algae

- Black or green growth on pool walls or a black fuzz along pool surface
- Use AFRICHEM ALGAECIDE / EXTRA STRENGHT

Cloudy or Milky Water

- Indicates incorrect pH and TA levels
- Test water using AQUACHECK YELLOW TEST STRIPS
- Adjust levels using AFRICHEM HYDROCHLORIC ACID, AFRICHEM pH INCREASE or AFRICHEM ALKALINITY BOOST
- Add ONE AFRICHEM WONDER CUBE or AFRICHEM CLEAR & BLUE to weir basket, backwash regularly after use

Small Brown or Rust Stains

- Brown stains may be caused by leaves or metal objects such as nails or hair clips
- General stains indicate a presence of metals in the water
- For fresh stains, use AFRICHEM METAL REMOVER and vigorously scrub the surface with a nylon pool brush
  Light staining can be bleached with AFRICHEM OXIDISE
