Chlorine comparison

Select the right chlorine for your pool & SAVE!

Types of chlorine

Stabilised/ Unstabilised	Chlorine type	Cups per container **	Approx. dosage every 2nd day *	Days of chlorine
Unstabilised	Calcium Hypochlorite Granular 4kg	16	1 Cup	30 days
Stabilised	**EcoGene Pro Chlor 4kg**	**26**	**1/2 Cup**	**> 60 days**

* Based on manufacturer's dosage rates for a 50,000 litre pool ** Cup holds 250g

Unstabilised Granular Chlorine

- Calcium Hypochlorite – lower avg. retail price
- 4 kg lasts 4 weeks
- Use approx. 250g every 2nd Day
- Has NO Sun Protection (Stabiliser)
- Contains Calcium – may cause cloudiness
- pH: 11.7 (requires acid dosage)
- May leave residue – slower dissolution

Stabilised Granular Eco Gene Pro Chlor

- Ultra-Chlor - premium avg. retail price
- 4 kg lasts about 2 months
- Use approx. 150g every 2nd day
- Built-in Sun Protection - contains Stabiliser
- Contains NO Calcium - no cloudiness
- pH: 6.0 - 7.0 (little or no acid required)
- Will not leave residue - fast dissolution
- Dependant on correct pool maintenance
